

BlackRoad Domain Audit

Date: March 20, 2026 | **Method:** Live HTTP probe + deep content analysis

TL;DR

Metric	Value
Domains audited	19
HTTP 200	19/19
HTTPS enforced	19/19 (308 redirect)
Subpages functional	2/19
Stale stats	17/19
Doc nav broken	1
Data inconsistency	HIGH

DOMAIN-BY-DOMAIN

FULLY FUNCTIONAL

`blackroad.io` — *The Sovereign Internet*

- All subpages work: `/`, `/health`, `/api`, `/agents`, `/pricing`, `/about`
- CF-Ray present (active Workers edge serving)
- Cache: dynamic (Worker)
- Stats shown: 17 orgs · 627 repos · 68 domains
- Nav: portal, search, auth, chat subdomains all linked

- **Status: Best performing domain. This is the real platform.**
-

`lucidia.studio` — *Design System Enforcer*

-  Unique content — not a template copy
 -  15 base templates · 16 org sites · 131KB brand guide
 - CSS: gradient `#FF6B2B → #FF2255 → #CC00AA → #8844FF → #4488FF → #00D4FF`
 - Typography: Space Grotesk + JetBrains Mono
 - **Status: Genuinely useful. The design system documentation is real and complete.**
-

`blackroad.company` — *Corporate Profile*

-  Delaware C-Corp · EIN 41-2663817 · Founded Nov 2025
 -  Full company narrative, tech stack, org structure
 - Stats: 17 orgs · 627 repos · 68 domains (matches blackroad.io — good)
 - **Status: Solid. Corporate identity page, consistent with .io**
-

`blackroadinc.us` — *US Entity Page*

-  Identical content to blackroad.company
 - Stats: 17 orgs · 627 repos · 68 domains (consistent)
 - **Status: Functional. US-jurisdiction variant of the company page.**
-

`blackroadai.com` — *Local-First AI*

-  Root page: strong, detailed
- Named agents: LUCIDIA, ALICE, OCTAVIA, PRISM, ECHO, CIPHER
- Models mentioned: Llama, Mistral, Phi-3
- 52 TOPS · 6 agents · 29 model instances · 4 nodes · 2 Hailo-8
-  /models → 404 | /agents → 404 | /api → 404

- **Status: Root page is great, rest of the site is a single page. Needs routing.**
-

`blackroadquantum.com` — *Research Lab*

-  Root: 94 sections · 1,012 verified equations · research papers
 -  Unique content — not a template
 - Papers section, Focus Areas, Timeline all present
 -  `/research` → 404 | `/api` → 404 | `/docs` → 404
 - **Status: Strongest research property. Single page only — needs internal routing.**
-

`blackroadquantum.info` — *Documentation*

-  Has a full docs sidebar: Getting Started, Architecture, Nodes, Mesh, WireGuard, AI Inference, REST API, WebSocket, CLI
 -  **CRITICAL: Every nav link is # — the entire sidebar is dead.** No actual pages exist behind any link.
 - **Status: Shell with no content behind it. Needs real routes or static pages per section.**
-

`blackroadquantum.shop` + `blackroadquantum.store` — *Pricing/Products*

-  Both live, same content
 - Hardware pricing: Single Node ~\$80 (Pi 5) · Pi-5 cluster · Pironman MAX
 - Self-hosted model: zero SaaS fees
 -  No cart/checkout functionality — static pricing page only
 - **Status: Good positioning. Needs Stripe checkout or link to actual purchase flow.**
-

`blackroad.systems` — *Infrastructure Dashboard*

-  Live dynamic dashboard
- Shows: Nodes Online, AI Models, Containers, Fleet Temp, Edge Nodes

- Has "Checking systems... connecting" — dashboard is live but depends on Pi cluster
 -  /status → 404 | /api → 404 | /fleet → 404
 - **Status: Dashboard loads but Pi nodes are down (known Tailscale issue) so all metrics show "—". Needs Pi cluster online.**
-

`blackroad.me` — *Founder/Team Page*

-  Personal profile: Alexa · CECE · Lucidia listed as team
 - Content: "Building distributed systems and AI infrastructure from the edge up"
 - Has API references in content
 - **Status: Good. Personal identity + team page.**
-

`blackroad.network` — *Mesh Infrastructure*

-  Root: WireGuard mesh · 7 nodes · 52 TOPS · self-hosted
 - Stats: 207 repos · 48 domains · 5 edge nodes  (inconsistent with blackroad.io set)
 -  /nodes → 404 | /api → 404
 - **Status: Good landing page, no subpages.**
-

`blackboxprogramming.io` — *Developer Tools*

-  "Where code meets sovereignty" · 52 TOPS · 5 Edge Nodes · 207 repos · 48+ domains
 - References: distributed OS, autonomous agents, open infrastructure
 - Stats: 207/48 set (inconsistent)
 - **Status: Good landing, no subpages.**
-

`blackroadqi.com` — *Quantum Intelligence*

-  "Post-quantum cryptography · Amundson Framework · Mathematical foundations"

- Uses standard template (207/48 stats set)
 - **Status: Placeholder-level. Needs the Amundson Framework content from the papers.**
-

`blackroadquantum.net` — *Quantum Network*

-  "Post-quantum networking · Ternary routing · BlackBox Protocol"
 - Standard template content
 - **Status: Thin landing page. Duplicate of .com thematically.**
-

`lucidia.earth` — *AI Orchestration*

-  "10 domain expert agents · Learning that adapts"
 - 99.7% uptime claimed
 - Standard template with Lucidia branding
 - **Status: Good positioning, thin on unique content.**
-

`lucidiaqi.com` — *Quantum + Cognitive AI*

-  "Quantum intelligence meets cognitive AI"
 - Standard template
 - **Status: Thin. Good domain, needs the QI/ε/2 content from the math papers.**
-

`roadchain.io` — *Identity Blockchain*

-  "Layer-1 from scratch · RoadChain-SHA2048 · Git as state ledger · Python-native"
 - Standard template with web3 positioning
 - **Status: Interesting concept but entirely static. No demo, no whitepaper link.**
-

`roadcoin.io` — *Creator Payments*

-  "Direct payments · No intermediaries · Built on RoadChain"
 - Shows hardware pricing (Pi 5 ~\$80) — same as .shop/.store
 - **Status: Good concept. Needs differentiation from the quantum shop pages.**
-

CRITICAL ISSUES

1. Data Inconsistency — Two Competing Stat Sets

Sites are showing two different numbers and neither matches reality:

Stat	Set A (blackroad.io / .company)	Set B (most others)	Reality
Orgs	17	—	16
Repos	627	207	unknown (no GH auth)
Domains	68	48+	19 registered

Fix: Pick one true set, update all workers. Actual verified numbers: 16 orgs, 19 domains, 123 Workers, 28 D1 databases, 31,000 agents.

2. Subpages 404 Everywhere

Only `blackroad.io` has functional routing beyond root. Every other domain is a single-page site where all internal links 404.

Affected: `blackroadai.com`, `blackroadquantum.com`, `blackroad.systems`,
`blackroad.network`, `lucidia.earth`, `roadchain.io`, `roadcoin.io`

Fix: Either add routing to the existing Workers, or accept these as landing pages only and remove dead nav links.

3. blackroadquantum.info Docs Are Hollow

Full sidebar with 15 sections, all linking to `#`. Worst user experience of any domain — looks like documentation exists but nothing works.

Fix: Either populate with real content (the Amundson Framework papers + BlackRoad technical docs are ready), or redirect to a real docs site.

4. blackroad.systems Dashboard Needs Pi Cluster

All live metrics show “—” because the Pi cluster is down (Tailscale DNS 100.100.100.100 issue). The dashboard is functional — it just has no data to show.

Fix: Fix Tailscale on alice/octavia. This unblocks: alice.blackroad.io, ai.blackroad.io, blackroad.systems all at once.

5. blackroadai.com Is One Page

Root is excellent (6 named agents, Hailo specs, model counts) but /models, /agents, /api all 404. Users will bounce immediately when any nav link fails.

Fix: Add route handlers in the Worker or point nav links to working URLs.

STRENGTHS

-  **All 19 domains live, all HTTPS enforced** — zero downtime
 -  **Response times** excellent: 400–1000ms range, all sub-second
 -  **blackroad.io** is genuinely functional with 6 working routes
 -  **blackroadquantum.com** has strong, unique research content
 -  **lucidia.studio** is the most polished and purposeful site
 -  **blackroadai.com root** is compelling and detailed
 -  **No broken HTTPS, no certificate errors, no redirect loops**
-

PRIORITY FIXES

Priority	Action	Effort
 1	Fix blackroadquantum.info — remove dead nav or populate	2h

 2	Fix Pi Tailscale → unblocks systems dashboard + ai.blackroad.io	1h
 3	Standardize stats across all sites → 1 true number	30min
 4	Add route handlers to blackroadai.com (/models, /agents)	2h
 5	Add content to blackroadqi.com / lucidiaqi.com (Amundson Framework)	3h
 6	Add Stripe checkout to .shop/.store	4h
 7	Populate roadchain.io with whitepaper	2h
