

JOUR 4251

Psychology of Advertising

5.2 Attitudes (Cont.)

Make sure to get an In-Class Assignment form before class starts and write down your name on the form.

Please share with the person next to you (groups of 2-3)

Recap Tuesday

- Why do people hold attitudes?
 - Adjustment function
 - Value-expressive function
 - Ego-defensive function
 - Knowledge function
- Attitude strength
 - Accessibility
 - Importance
 - Knowledge
 - Certainty
 - Ambivalence

Attitude formation vs attitude change

Formation

You don't have an existing attitude; issue is novel.
Lower effort, not as much elaboration

Attitude change

You are changing an existing attitude.
Takes more cognitive effort.

Attitude formation

Attitudes formed from direct experiences are more predictive of future behavior than ones formed from indirect experience.

Cognitive

- Heuristics

AdChoices

Affective

- Mere exposure
- Classical and evaluative conditioning

Behavior

- Self-perception
- Reinforcement

Heuristics

The use of quick associations - cues, stereotypes - in forming attitudes toward products, communicated in ads.

Examples

Brand name (brand image)

Consumer version of stereotyping

Brand equity: the value added to the product by the brand name

Country of origin / location

Price

Mere exposure

CAPACITY
IS HOW MUCH MEMORY IS
STORED

If you show it a lot, your product will be more positively rated

- Is more familiar / becomes accessible
- Easier to process
- Processing fluency

BUT

Wear-out effect: when too much repetition results in consumers becoming increasingly negative toward the message

Alternative explanation for liking

Classical and evaluative conditioning

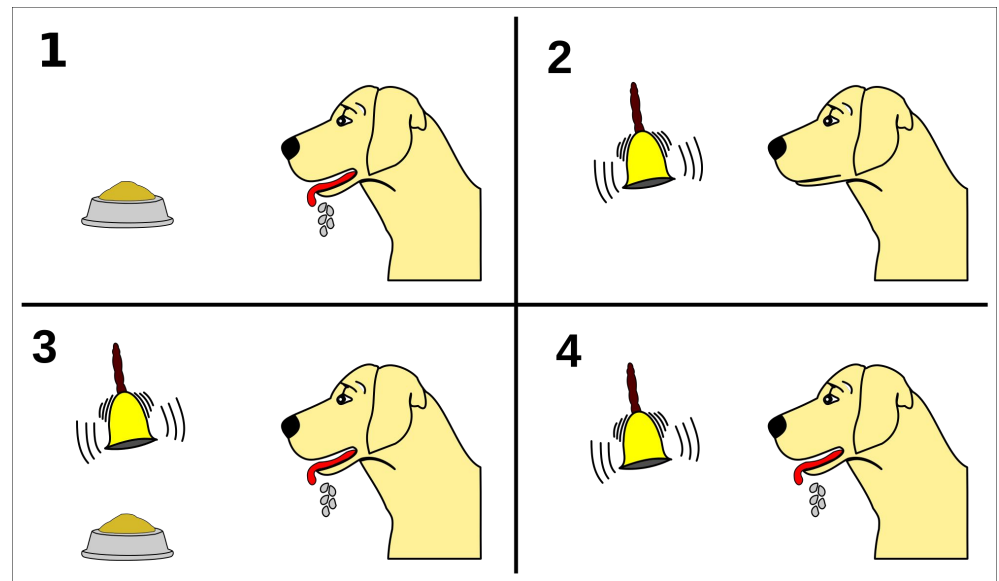

Pavlov's dogs

Unconditioned stimulus (food)

Conditioned stimulus (sound)

Anticipation

Effect fades in the absence
of the unconditioned stimulus.

How does this work in advertising?

- 'Expectation'?
 - Pavlov
- Misattribution?
 - Attribute positive feeling to product
- Association?

Feeling remains in the absence of signal.

Behavior

Self-perception

“I recycled the bottle, so I must care about the environment”

“I drink a lot of pepsi. Thus, I must like this brand”

=> only when you have little information

Reinforcement

How do you feel about brand X?

Positive (GOOD) or negative reaction

Positive reinforcement results in more stronger attitudes

Think like an advertiser (1)
You want to use an ad to help form a positive
attitude toward your brand

Goals

Cognitive representations of desired end states
What you want. Can be abstract or more specific.

Be happy, be healthy, buy food for dinner

To be adopted as a goal, it needs to be:

- Desirable
- Attainable
- Improvement from current state

Goals

Behavioral intention: get food for dinner

Implementation intention (how?): purchase these three items from a particular supermarket at 4 PM today

Focal goal: actively pursue + consciously aware

Background goal: might influence goal pursuit, but not explicitly aware of it at that time

Goals in buying

- **Utilitarian goals:** things you need; practical. I need toothpaste so I buy toothpaste
- **Self-expression goals:** I wear designer clothes

People differ individually on whether they buy stuff for utilitarian or self-expression purposes.

And, the goals differ by product.

Goals in buying

- **Identity goals:** this product helps me to be the person I want to be
- **Hedonic goals:** no purpose other than pleasure; candy, jewelry

Implications for advertisers:

What goals are your customers holding when create your ad?

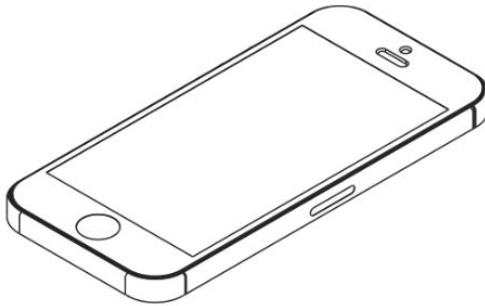

Aligning your ad with one of these goals.

Match = more favorable thoughts.

Think like an advertiser (2)

- Pick a product
- Decide what purchasing goal your customers would likely hold
 - Utilitarian
 - Self-expression
 - Identity-building
 - Hedonic
- Come up with an advertising concept (an idea of how to sell your product, slogan, campaign idea) that responds to that goal
- Show how the product fits

What's next?

- Review session on Tuesday
- Exam 1 on Thursday (in class)

The week after the exam:

- Assignment #3 due **by March 5** before class starts
