

JOUR 4251

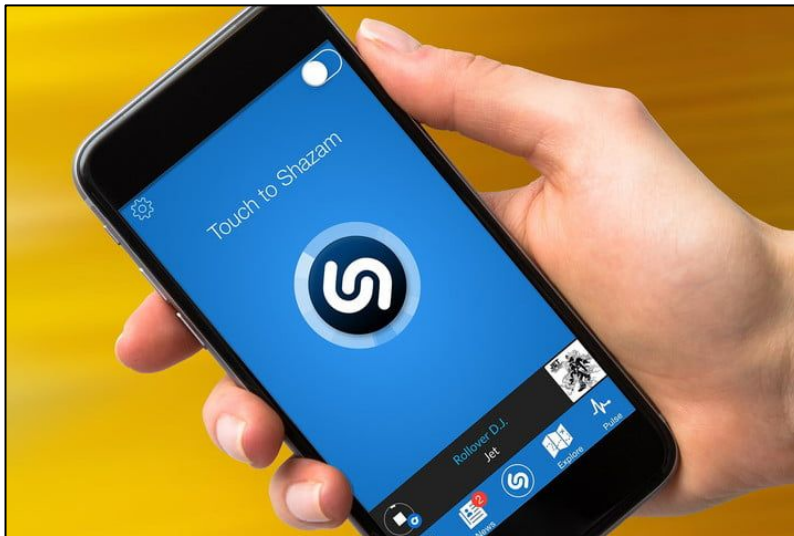

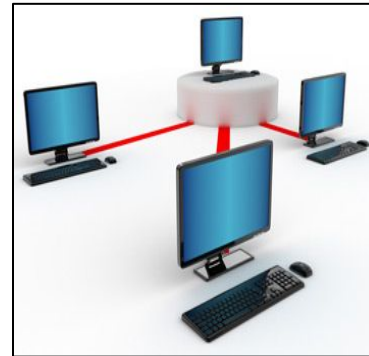

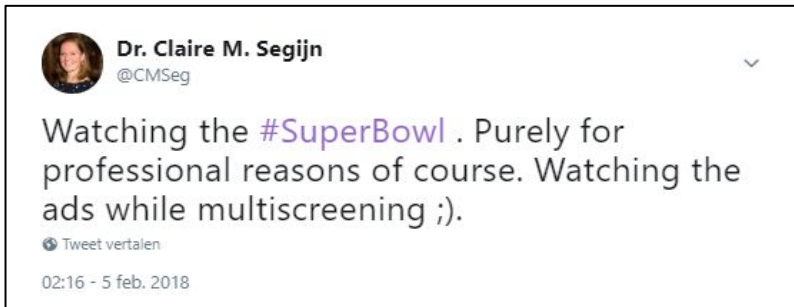

13.2 Personalization 2

Synced advertising

“ The practice of monitoring people’s current media behavior and using the collected information to show people individually targeted advertising based on people’s current media behavior across platforms”

How?

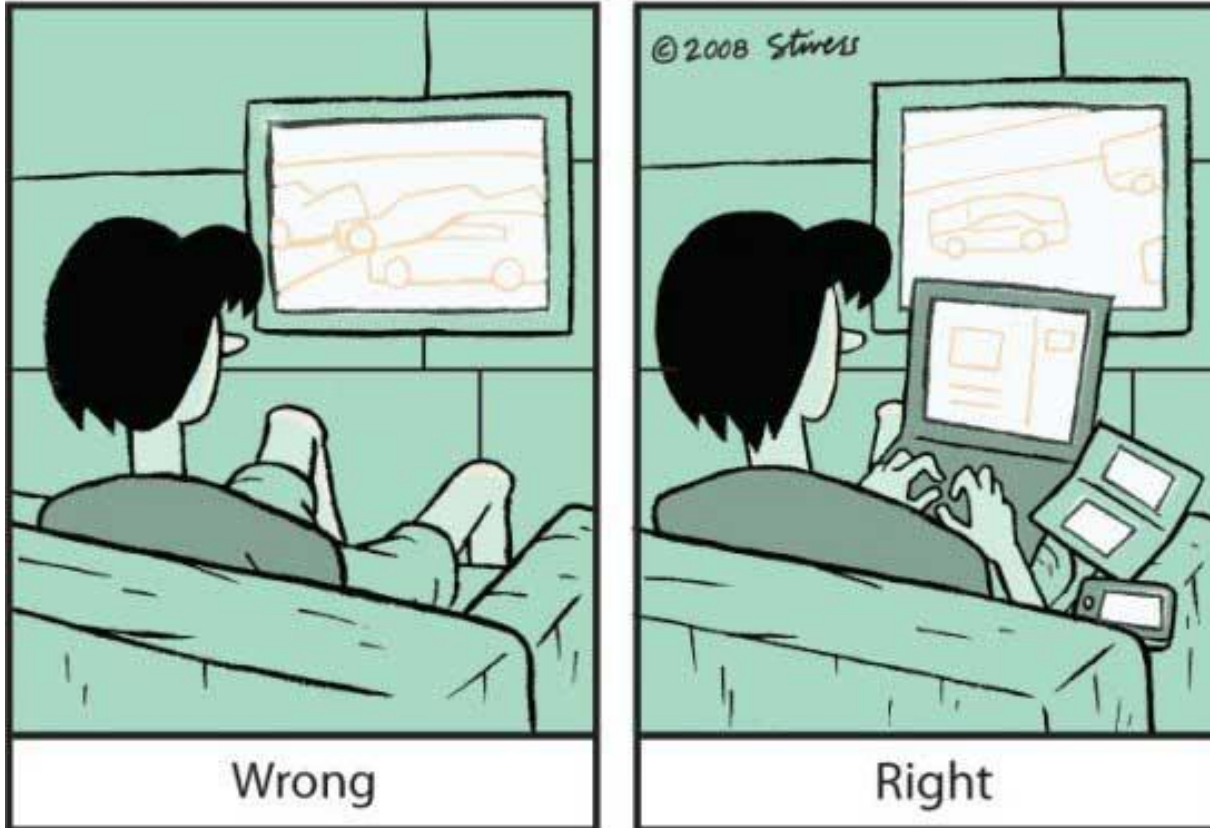

Opportunities for advertisers

1. Increased chance of exposure

Rule #27: Always watch at least two screens at once.

People switch
2.5x per minute

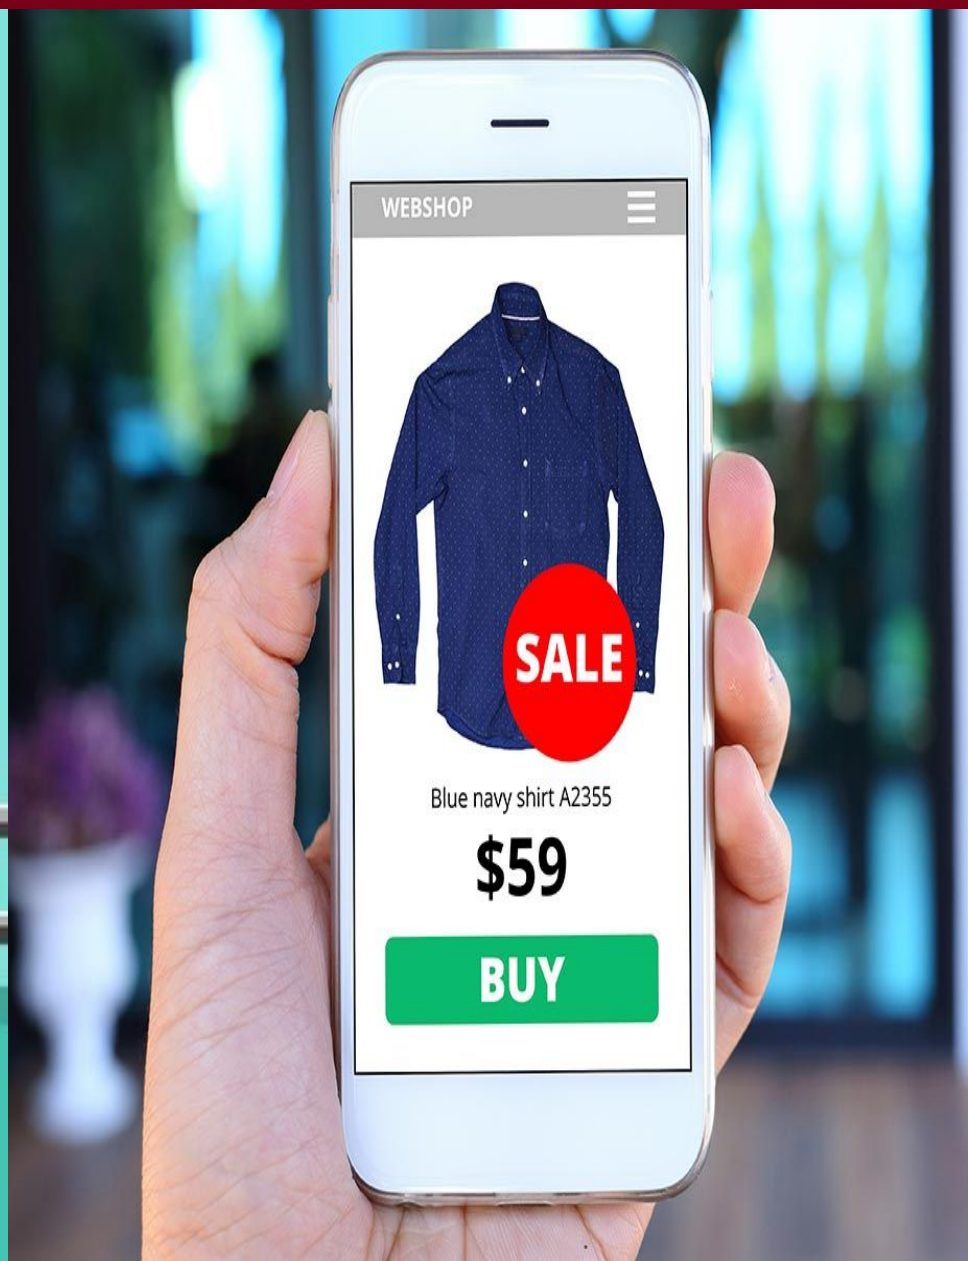

2. Chance of repeated exposure

3. Synergy effects

“Synergy occurs when the combined effect of multiple activities exceeds the sum of their individual effects”

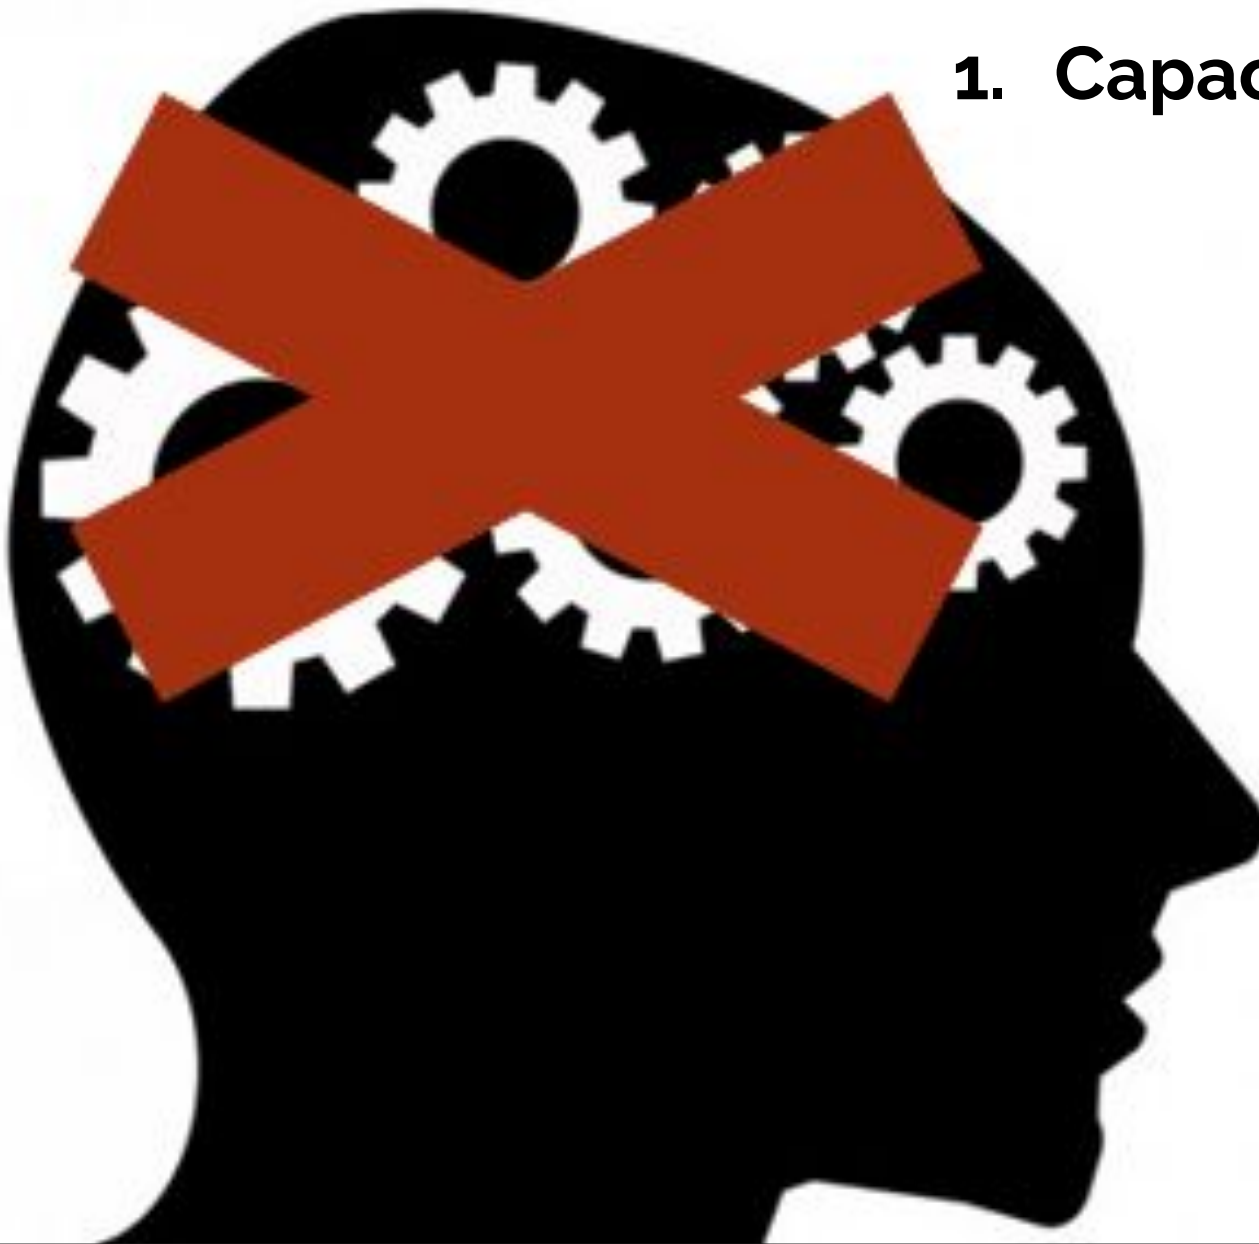

$$1+1 = 3$$

Barriers for advertisers

1. Capacity interference

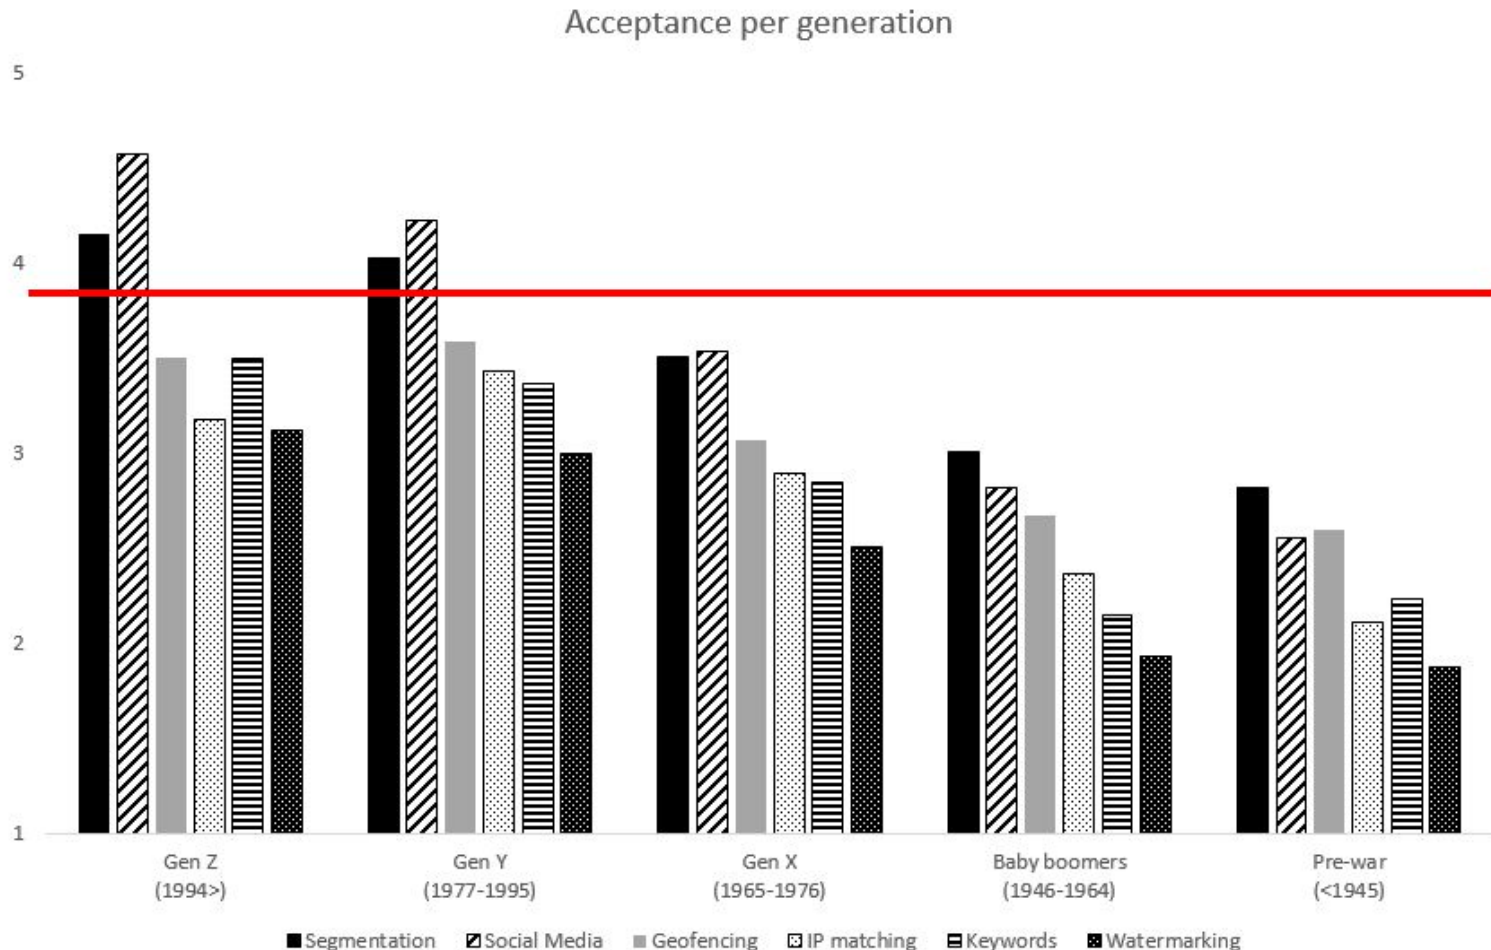

2. Perceived surveillance & creepiness

“[Targeted advertising] is really starting to scare people and creep them out a little bit.”

2. Perceived surveillance & creepiness

Social contract theory & Expectancy violation

- Companies that collect and use people's data are expected to treat this data in a responsible manner through an implied '**social contract**'
- When data is collected without people's knowledge or consent, this social contract is **violated**
- Violation of social contract leads to distrust

3. Accuracy trade-off
